

Tompkins County Wetland Mapping Pilot Project: Town of Dryden

Locator Map for Dryden 012 Wetlands Map Series

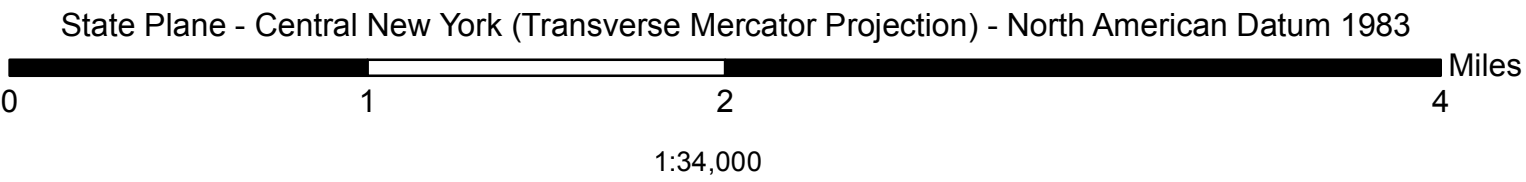

Wetlands in the Town of Dryden were mapped by visual interpretation of the 2012 high-resolution aerial imagery available from the New York State Digital Orthoimagery Program (NYSDOP) and topographic analysis of high resolution LiDAR elevation data collected in 2008 by Pictometry (Rochester, NY) with funding from the Tompkins County Soil and Water Conservation District. All wetlands in the study area were delineated, with no minimum wetland size, and described using the USFWS Cowardin classification for Wetlands and Deepwater Habitats (Cowardin et al, 1979).

This project was supported by the Cayuga Lake Watershed Network with funding from the Tompkins County Soil and Water Conservation District (TCSWCD) via the Finger Lakes – Lake Ontario Watershed Protection Alliance (FL-LOWPA), and in-kind match from several sources. For comparison purposes, the USFWS National Wetlands Inventory and the New York State Wetlands Map data are also shown.
